Yousif Hajajj

6th of October, Giza | yosefys236@gmail.com | 01127609258 | LinkedIn | GitHub | Portfolio

Experience

Tameer for Facilities Management | Software Engineer **Jan 2026 – Present**

- Developed and launched the company's official website, strengthening its digital presence and generating new inbound leads.
- Built a complaints management system enabling residents of major compounds (Dar Misr, Sakan Misr, Social Housing) to submit and track complaints, cutting resolution time and improving customer satisfaction.
- Designed and deployed a biometric fingerprint attendance system to track on-site supervisors across project locations, eliminating manual attendance logs and boosting accountability.
- Led follow-up on ERP implementation across departments, streamlining core business processes and improving reporting accuracy.
- Built and maintained server and network infrastructure across company branches, driving digital transformation and reducing system downtime.

EXSUS | Full Stack Developer **Jul 2025 – Jan 2026**

- Delivered full-stack .NET and Angular features across multiple production systems, including a Smart Inspection System, a Smart Office Management platform, and a Talent Management System for the Fujairah Environment Authority.
- Designed clean, layered system architecture for end-to-end features, cutting development time through reusable components.
- Deployed and maintained web applications in production with high uptime, serving active users across client organizations.

Almentor | Part time Coordinator **Jun 2024 – Jun 2025**

- Coordinated live learning sessions for large audiences, ensuring smooth delivery and effective learning outcomes.
- Managed session logistics for hundreds of attendees, improving on-time session start rates.
- Provided direct support to students in each cohort, increasing participation and session engagement.

FREELANCE | AI Engineer – Irrigation Scheduling Project **Apr 2025 – Mar 2025**

- Built a machine learning model that predicted soil water needs with high accuracy, reducing unnecessary water usage.
- Produced full technical documentation with 4 UML diagram types (Use Case, Sequence, Class, Component) covering all system modules.
- Delivered a functional solution adopted to support data-driven agricultural decisions in the field.

SMSM AI | NLP Engineer **Mar 2024 – Jun 2024**

- Spearheaded a real-time Egyptian dialect machine translation project, achieving strong translation accuracy.
- Promoted to Team Leader within months, managing a team of engineers.
- Led data collection efforts, gathering and curating a large volume of samples for model training.
- Oversaw implementation of machine translation models, improving inference speed and accuracy.
- Delivered the project on schedule, meeting the defined success metrics.

ZEWAIL CITY | AI TRAINEE **Aug 2023 – Jan 2024**

- Completed hands-on training in AI and machine learning fundamentals over several months.
- Built data science/AI projects analyzing real-world datasets, applying core AI principles to practical problems.
- Gained proficiency in big data analytics and machine learning through applied exercises and case studies.

Projects

Office Management System (.NET, Angular). Link **Aug 2025 – Nov 2025**

Overview: Smart office management system for tasks, messages, meetings, partners, visits, employees, and KPI tracking — built with ASP.NET Core & Angular using clean layered architecture, real-time notifications, and secure JWT authentication. Demo Login: f@f.com / Aa@12345

Smart inspection system (.NET, Angular). Link **Jul 2025 – Aug 2025**

Overview: Smart inspection system for managing inspection campaigns, recording violations, and tracking cases on an interactive live map — built with ASP.NET Core & Angular using clean layered architecture and secure JWT authentication. Demo Login: admin@admin.com / Admin@Admin123

Full-Stack E-Commerce (.NET, Angular). **May 2025 – Jun 2025**
Overview: Modular e-commerce platform using ASP.NET Core 8 & Angular 17 with JWT auth, Redis basket, Stripe payments, and clean layered architecture.

CineFlex (MVC). **Feb 2025 – Feb 2025**
Overview: Movie booking web app with ASP.NET Core MVC featuring movie browsing, ticket booking, admin dashboard, full CRUD, and role-based access.

Education

Bachelor of Computers and Artificial Intelligence, Banha University — Aug 2020 – Aug 2024

Major: Artificial Intelligence | Minor: AI | Grade: Very Good

Skills

Computer: Proficient in Microsoft Office (Word, Excel, PowerPoint, Outlook, Forms, Power BI, Tableau); skilled in computer troubleshooting (hardware & software).

Software Development: C#, ASP.NET Core Web API, ASP.NET MVC, Angular, TypeScript, SQL Server, Entity Framework, LINQ, Git and GitHub, Redis, JWT Auth, Bootstrap, Tailwind, Docker, Postman.

AI: Python (NumPy, Pandas, etc.), Machine Learning, Deep Learning, Data Science, Data Mining, Data Analysis and Analytical Skills, NLP, LLM, Transformers, GenAI.

Language: Arabic (Native), English (Professional).

Certifications

- AWS Academy Data Engineering — 2024 | AWS Academy
- SQL Certificate — 2024 | HackerRank
- Artificial Intelligence and Applications Training — 2024 | ZEWAIL City
- Python for Data Science, AI and Development — 2024 | IBM
- Deep Neural Network — 2023 | deeplearning.AI
- CCNA from Cisco Networking Academy — 2022 | Cisco
